

# WIND ENERGY SCIENCE

The open-access journal  
of the European Academy of Wind Energy

The European Academy of Wind Energy is proud to announce **Wind Energy Science**, the new **international scientific journal** dedicated to rapid publication and public discussion of studies that take an interdisciplinary perspective of fundamental or pioneering research in wind energy.

**Topics of Wind Energy Science** are inter alia:

- material science and structural mechanics
- wind and turbulence
- aerodynamics and hydrodynamics
- design methods, reliability, and uncertainty modelling
- control and system identification
- electricity conversion, the grid and power generation
- offshore technology
- environmental and social-economic aspects

For more information visit [www.wind-energy-science.net](http://www.wind-energy-science.net) or [www.eawe.eu](http://www.eawe.eu) for any academy related topic.

You want to be informed when the first volume will be published? Just send an email to [journal@eawe.eu](mailto:journal@eawe.eu) and we will keep you updated.
